Ale Piling

Ale Piling are the UK's leading installer of sheet piles and earth retaining systems using side grip technologies. We have a large modern range of various sized rigs, floating craft and transport allowing us to respond quickly and efficiently to all of our customers needs.

Our equipment is maintained and serviced in house to the highest standards, which allows us to operate reliably, and in a fashion that suits the safety, environmental and efficiency demands of today's modern construction site and working environments.

We carry a large stock of new and used sheet piles, steel sections and various piling accessories; ideal for short lead times onto site and responding to emergency situations.

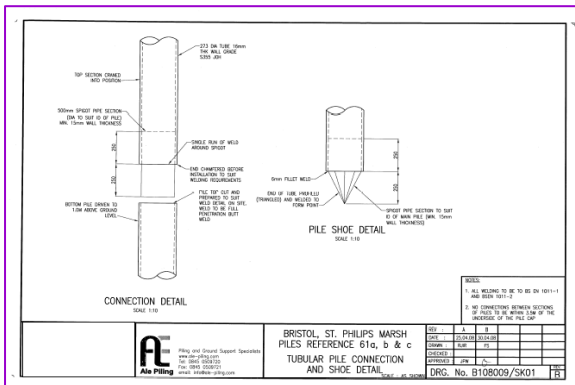

The workforce of Ale Piling are 100% CSCS Qualified, which includes any trainees or new staff who are automatically registered on to the scheme, in line with the company's induction and training policy. Our operators are suitably qualified for the equipment they are using, as well as a large number of personnel being suitably qualified to operate within specialist fields such as, crange, rail and maritime environments.

With our in house design and estimating team we can assist you in your project sheet piling and earth retention support requirements from conception, the planning and costing and finally its construction. Our experienced staff can offer advice on your particular project, provide a full design and a comprehensive quotation. We can offer a full range of clutch pile sealants, welding services, cleaning and coatings to provide permanent fully sealed underground basements.

As part of our comprehensive design service we can offer more detailed drawings and information suitable for Network Rail, The Highways Agency, Utilities Companies and other similar organisations approvals.

Our equipment and services are extremely adaptable and can be used on a variety of schemes which have limited access, tight deadlines or specialist environmental considerations.

Please contact us to discuss your requirements and see how we can help you!
